

Recruiting Postdoctoral Candidates

The PC group aims to train lab group members to become excellent *Chemist-citizens*, who will be able to perform well in either academia or industry.

We are seeking highly motivated organic chemists, who will soon/have completed a PhD degree in a relevant chemistry field, to do research in **organic synthesis** to join our group! Applicants from industry are also welcome.

Relevant fields/backgrounds include organic synthesis methodology development, total synthesis, and organometallic chemistry. A background in only natural product isolation will not be suitable.

Candidates should be passionate about organic synthesis, experienced in synthesis experiment design and execution, skilled in relevant instrumentation and safe lab practices. He/She should be very strong in organic chemistry fundamentals, familiar with the latest published synthetic chemistry, and enthusiastic to mentor and take up leadership in the lab group to further learning and research in organic synthesis. A solid, relevant publication record is also required. Experience in the preparation of research proposals is a plus.

Interested individuals should write to Prof. P. Chiu (pchiu@hku.hk) about your intent and interest and time of availability. Two letters of recommendation are also needed. Candidates will also be interviewed in person or via Skype.

Positions may not be immediately available, the detailed arrangements should be discussed with Prof. P. Chiu.
